PROFILE SUMMARY

As a UI/UX and Frontend Developer, my mission is to create visually appealing, intuitive, exceed user expectations. I am excited to contribute my skills and creativity to projects that push the boundaries of web design and elevate user experiences

EDUCATION HISTORY

Graduation

B.Sc(Physics)   2020-2023

Manonmaniam Sundaranar University

WORK EXPERIENCE

Jul 2023 to Present

Frontend Developer Intern at Intellect Software Technologies

Assist in coding and maintaining web interfaces, collaborating with senior developers to implement design concepts. Learn and apply HTML, CSS, and JavaScript skills to create responsive and user-friendly websites. Gain hands-on experience in debugging and troubleshooting frontend issues, contributing to a dynamic development team. Contribute to web development projects while refining coding proficiency and adapting to industry best practices.

PROJECTS

Website Development and Database Management Internship Project., 3 Months

At my internship I build a websiteand manage a database. My main goals are to create a functional website, organize and handle data, and gain practical skills in web development. I'll follow a step-by- step approach, including research, design, coding, and testing, and I'll keep track of my progress with a timeline.I'll need access to the necessary software and guidance along the way. At the end of the internship, I expect to have a working website, a well-structured database, and improved coding skills. I'm eager to contribute to this project and learn as much as I can
